SKILLS

- Surface Well Testing
- Data Acquisition
- Multiphase Flow Meter (Vx)
- Slickline

PROFESSIONAL TRAINING

- Phase Tester Vx Course, Schlumberger European Learning Centre, France.
- Xpert Slickline Training, Schlumberger European Learning Centre, France.
- Xpert Surface Welltest, Schlumberger European Learning Centre, France

EDUCATION

Diploma in Mechanical Engineering
State Polytechnic of Jakarta,
Indonesia

LANGUAGES

Bahasa Natives
English Fluent

SUMMARY

Experienced oilfield professional with over 16 years of expertise in Surface well testing operations, data acquisition, Multiphase flow meter Vx, and slickline operations. Proven track record in utilizing advanced technologies such as Multiphase Flow Meter Vx Spectra for both onshore and offshore projects. Adept at handling high-temperature and high-pressure wells, and proficient in delivering accurate and reliable data.

EXPERIENCE

SWT and DAQ Specialist (*June 2021 – Nov 2025*) – **SLB**

- Conducted frac flowback and EPF operations-water diversion project, ensuring precise data acquisition and daily reporting to shell development Oman.
- Worked with Daleel Petroleum and OQ Petroleum as a Multiphase Meter Vx Specialist, handled maintenance and troubleshooting of Vx meters, ensuring optimal performance and accuracy.
- Supervised Vx spectra daily well test operations, conducting multi rate tests on production wells in Saudi Arabia, bani howtah field, reported data production and operational updates directly to Aramco foreman.
- Conducted MPFM Vx Spectra operations for frac flowback and acid well clean-up in Udhailiyah and Uthmaniyah field, Saudi Arabia.

Business owner (*October 2017 – Jan 2021*)

- Conducted hydroponics training for retired civilians and small villages.
- Provided hydroponics tools, equipment, and installation services.

Surface Well Test Specialist (*July 2014 – Sept 2017*) - **SCHLUMBERGER**

- Involved in ECS (expendable choke system) clean-up proppant and acid frac.
- Led Production well test operations using Vx Spectra, ensuring accurate data production and reporting to Aramco foreman.

MPFM Vx Specialist (*September 2012 – June 2014*) - **SCHLUMBERGER**

- Successfully managed the complete operational cycle of multi-rate well tests using MPFM Phase Tester Vx in a complex, high risk unmanned offshore platform environment in Brunei Darussalam.

- Worked with 10K sand filter to support coil tubing for nitrogen lift and acid clean up.

Slickline Specialist (*September 2009 – August 2012*) -SCHLUMBERGER

- Conducted daily slickline operations, including equipment preparation and mobilization.
- Supported coil tubing for acid clean-up with H2S surface pressure equipment.
- Experienced with basic slickline tools, shifting tools, and pulling tools.

SWT and MPFM Vx Specialist (*Sept 2005 – Sept 2009*) -
SCHLUMBERGER

- Supported MPFM Vx operations in Indonesia, Iran, Sudan, Oman and Saudi Arabia.
- Worked on various Vx projects, including Chevron Pacific Indonesia and Karau Island.

Innovation & Digital Projects

Android Software Development ([SWT/DAQ App](#)):

- Designed and deployed a custom Android application (available on Google Play Store) to bridge critical efficiency gaps in field data acquisition.
- Successfully translated complex operational requirements into a user-friendly digital interface, reducing human error and optimizing reporting workflows.
- Demonstrated a unique hybrid skillset by merging 16+ years of Well Testing subject-matter expertise with mobile app development to drive operational digitalization.

Technical Knowledge Management (www.surfacewelltestguide.com):

- Developed and maintain a comprehensive digital repository serving as an accessible reference for API standards, POM, FOH guidelines and introduction to well testing manual book.
- Created a centralized platform to bridge the gap between theoretical engineering standards and practical field execution, promoting operational excellence and safety compliance.
- Showcases a proactive commitment to industry standardization and continuous learning by digitizing essential technical resources for the Well Testing community.
